

In Bulletin No. 2)3 Jack Brandt disclosed that perfin of CLI (C452.1) and IVE (C1261) were in fact partials of the un-catalogued perfin "CLIVE". Now Harry Skinner reports the discovery of a full strike of this design on a 2/6 Seahorse Issue (1913/18). He also suggests that in view of the dates of use and the size of the die it is only likely to be found in full use on these Seahorse issues
